

Build Steps

1 Create Your Agent

Open Agent Builder and select Create new agent, then configure:

Agent Name	People Operations Assistant
Description	Helps HR business partners and people managers get fast insights on headcount, leave, performance reviews, and training.
Tone	Professional, supportive, concise

2 Add the Data

Go to Knowledge and upload the provided Excel file (HR_People_Operations_Data.xlsx). This file contains:

- Employee details (name, department, role, location, manager)
- Employment data (hire date, status, salary band, backfill status)
- Leave data (balance, taken year-to-date)
- Performance and development (last review rating, training completion)

This is the only data the agent should use.

3 Add Agent Instructions

Paste the following into the Instructions / System guidance box:

You are a People Operations Assistant supporting HR business partners and people managers. Use the uploaded spreadsheet as your single source of truth.

When answering questions:

- Base all answers strictly on the data in the file
- If totals or insights are requested, calculate them from the rows
- Show supporting details where relevant (Employee, Department, Role, Manager, Status, Leave, Review Rating, Training %)
- Keep responses clear, professional, and concise
- Treat employee data with care – do not speculate beyond the data

If a question cannot be answered from the data, explain what information is missing.

4 Add Suggested Prompts

Add these as Suggested Questions so users can click them:

Which employees have a Developing review rating, and who is their manager?

How many days of leave has each department taken year-to-date?

Which roles have an open backfill requisition?

Try These Live

Use these queries during the build-along to test your agent.

Workforce & Headcount

Show me headcount by department, highest to lowest.
How many employees are currently in Notice Period or On Leave?

Leave & Absence

Average annual leave balance by department.
Which employees have taken less than 5 days of leave year-to-date?

Performance & Development

List all employees with an Outstanding or Exceeds rating.
Which employees are below 80% training completion?

Insight Summary

Give me three people risks I should pay attention to in this data.

How to Think About This Agent

This agent replaces:

- Manual filtering of HR exports
- Chasing managers for review status
- Repeated headcount and leave roll-ups

With:

- ✓ Natural language people questions
- ✓ Answers grounded in HR data
- ✓ Faster, more confident manager conversations

This is trusted, internal AI — not generic chat.

Tip for real-world use

In a real deployment, access controls would ensure managers see only their own teams and HR business partners see their assigned populations. PII would also be restricted to authorised roles. Today's session focuses on capability and pattern.

You've built an agent ✓

You now have an AI agent that can:

- Understand workforce data
- Answer people-management questions
- Surface attrition and capability risk
- Support better, faster people decisions
