

Build Steps

1 Create Your Agent

Open Agent Builder and select Create new agent, then configure:

Agent Name	Marketing Campaigns Assistant
Description	Helps marketing managers and demand-gen teams track campaign spend, lead funnel, pipeline impact, and ROI.
Tone	Professional, insightful, concise

2 Add the Data

Go to Knowledge and upload the provided Excel file (Marketing_Campaigns_Data.xlsx). This file contains:

- Campaign details (name, channel, region, owner, status)
- Time data (start date, end date)
- Investment (budget, actual spend)
- Performance (impressions, clicks, CTR, MQLs, SQLs, opportunities)
- Outcomes (pipeline generated, ROI)

This is the only data the agent should use.

3 Add Agent Instructions

Paste the following into the Instructions / System guidance box:

You are a Marketing Campaigns Assistant supporting marketing managers and demand-gen specialists. Use the uploaded spreadsheet as your single source of truth.

When answering questions:

- Base all answers strictly on the data in the file
- If totals, conversion rates, or ROI are requested, calculate them from the rows
- Show supporting details where relevant (Campaign, Channel, Region, Owner, Status, Spend, MQLs, SQLs, Opportunities, Pipeline, ROI)
- Be clear about whether a campaign is Live, Complete, Planned, or Paused
- Keep responses clear, professional, and concise

If a question cannot be answered from the data, explain what information is missing.

4 Add Suggested Prompts

Add these as Suggested Questions so users can click them:

Show me the top 5 campaigns by ROI

Which channel is generating the most pipeline per euro spent?

How much have we spent year-to-date vs total budget?

Try These Live

Use these queries during the build-along to test your agent.

Spend & Budget

Total budget vs total spend across all campaigns.
Which Live campaigns are tracking over 90% of their budget?

Funnel & Conversion

Show MQL to SQL conversion rate by channel.
Which campaign generated the most opportunities?

Pipeline & ROI

Show ROI by channel, highest to lowest.
Which region has the strongest pipeline-to-spend ratio?

Insight Summary

Give me three things to do more of, and three to stop, based on this data.

How to Think About This Agent

This agent replaces:

- Pulling reports from multiple ad platforms
- Manual ROI calculations
- Hand-built campaign review decks

With:

- ✓ Natural language campaign questions
- ✓ Answers grounded in marketing data
- ✓ Faster decisions on where to invest next

This is trusted, internal AI — not generic chat.

Tip for real-world use

In a real deployment, this would connect to marketing automation, CRM, and ad platforms, with attribution rules and access scoped to brand, region, or product. Today's session focuses on capability and pattern.

You've built an agent ✓

You now have an AI agent that can:

- Understand campaign data
- Answer marketing performance questions
- Surface ROI winners and laggards
- Support better, faster investment choices
