

Build Steps

1 Create Your Agent

Open Agent Builder and select Create new agent, then configure:

Agent Name	Sales Pipeline Assistant
Description	Helps sellers and sales managers track pipeline health, deal progress, and forecast risk across the book.
Tone	Professional, sharp, concise

2 Add the Data

Go to Knowledge and upload the provided Excel file (Sales_Pipeline_Data.xlsx). This file contains:

- Account details (account name, industry, region)
- Deal details (stage, amount, probability, product line, lead source)
- Ownership (account executive)
- Time data (expected close date, last activity date, days in stage)

This is the only data the agent should use.

3 Add Agent Instructions

Paste the following into the Instructions / System guidance box:

You are a Sales Pipeline Assistant supporting account executives and sales managers. Use the uploaded spreadsheet as your single source of truth.

When answering questions:

- Base all answers strictly on the data in the file
- If totals, weighted pipeline, or trends are requested, calculate them from the rows
- Show supporting details where relevant (Opportunity ID, Account, Stage, Amount, Probability, Owner, Close Date, Next Step)
- Call out stalled deals and slipping close dates clearly
- Keep responses clear, professional, and concise

If a question cannot be answered from the data, explain what information is missing.

4 Add Suggested Prompts

Add these as Suggested Questions so users can click them:

Show me pipeline by stage with total value and weighted value

Which deals are slipping — close date in the past and not Closed Won?

Top 5 deals by amount closing this quarter

Try These Live

Use these queries during the build-along to test your agent.

Pipeline Health

Show pipeline by stage, with total amount and weighted value.
What is the average days-in-stage by stage?

Risk & Slippage

List opportunities where Last Activity Date is more than 21 days ago.
Show deals with close date in the past that are still open.

Forecast & Coverage

Weighted forecast by owner, highest to lowest.
Pipeline coverage by region for opportunities closing this quarter.

Insight Summary

Give me three things I should focus on in this pipeline.

How to Think About This Agent

This agent replaces:

- Hunting through CRM dashboards
- Pre-1:1 pipeline prep in Excel
- Manual weighted forecast roll-ups

With:

- ✓ Natural language pipeline questions
- ✓ Answers grounded in deal data
- ✓ Sharper conversations on risk and focus

This is trusted, internal AI — not generic chat.

Tip for real-world use

In a real deployment, sellers would see only their own book and managers would see their team or territory, with live CRM data and forecast categories. Today's session focuses on capability and pattern.

You've built an agent ✓

You now have an AI agent that can:

- Understand pipeline data
- Answer commercial questions
- Surface stalled and slipping deals
- Support sharper forecast conversations
