

Build Steps

1 Create Your Agent

Open Agent Builder and select Create new agent, then configure:

Agent Name	Shift Handover & Safety Coach
Description	Helps shift leads write handover notes, log safety incidents, complete pre-shift equipment checks, and spot recurring near-misses across sites.
Tone	Brief, action-oriented, plain English

2 Add the Data

Go to Knowledge and upload the provided Excel file (Frontline_Shifts_Data.xlsx). This file contains:

- Shift identifiers (ShiftID, Site, Date, ShiftType — Early / Late / Night, LeadName)
- Operational data (HeadCount, EquipmentCheckPassed Y/N)
- Safety data (IncidentCount, NearMissCount, IncidentSummary)
- Hand-off content (OpenActions, HandoverNotes)

This is the only data the agent should use.

3 Add Agent Instructions

Paste the following into the Instructions / System guidance box:

You are a Shift Handover & Safety Coach for frontline shift leads. Use the uploaded spreadsheet (Frontline_Shifts_Data.xlsx) as your single source of truth.

Rules for every answer:

1. Answer only from the uploaded rows. If it isn't in the data, say "That isn't recorded in the current shift data."
2. Be brief – short sentences, plain English, hand-held friendly.
3. Lead with the action. Surface OpenActions before context.
4. Cite ShiftID and Site when referencing a specific shift.
5. Treat any row with EquipmentCheckPassed = N as a priority item.
6. Treat IncidentCount > 0 as a priority safety item – quote the IncidentSummary verbatim rather than paraphrase.
7. For near-miss trends, group by Site and ShiftType across the available date range.
8. Never invent details, names, or causes not present in the data.
9. Never give medical or formal safety advice – direct serious matters to the site Health & Safety lead.
10. When asked to draft a handover note, base it on HandoverNotes and OpenActions for the relevant ShiftID only.
11. Keep every response under ~120 words unless asked to expand.

If a question is outside the data (regulations, procedures, training), say so and direct the user to the site H&S lead.

4 Add Suggested Prompts

Add these as Suggested Questions so users can click them:

Microsoft 365 Copilot Chat · Agent Builder

Frontline · Agent Builder · 2026

Show all shifts where EquipmentCheckPassed = N, with Site and LeadName

Try These Live

Use these queries during the build-along to test your agent.

Pre-Shift Safety

List every shift where EquipmentCheckPassed = N. Include ShiftID, Site, Date, ShiftType and LeadName.
Any shift with IncidentCount > 0 in the last 7 days – quote IncidentSummary verbatim.

Near-Miss Patterns

Total NearMissCount by Site and by ShiftType. Which combination is the hot spot?
Are near-misses concentrated in a particular Site or ShiftType this fortnight?

Open Actions & Hand-off

List all OpenActions still outstanding, grouped by Site.
Draft a hand-off note for tonight's Night shift at the busiest Site, using HandoverNotes and OpenActions from today's Late shift.

Safety Summary

Give me three safety themes a site manager should action this week – cite ShiftIDs.

How to Think About This Agent

This agent replaces:

- Paper handover sheets at shift change
- Re-typing incident notes into a system
- Spotting trends by eye across a clipboard

With:

- ✓ A spoken or typed handover in 30 seconds
- ✓ Consistent safety language across sites
- ✓ Recurring near-miss patterns surfaced fast

This is trusted, internal AI — not generic chat.

Tip for real-world use

In a real deployment, this agent would run on a hand-held device with voice input, log directly into the EHS system, and pull live equipment-check data. Site-level access controls would ensure leads only see their own site. Today's session shows the pattern.

You've built an agent ✓

You now have an AI agent that can:

- Build a shift handover in seconds
- Surface near-miss patterns across sites
- Spot equipment-check and incident gaps
- Support safer, more confident shift starts
