

Build Steps

1 Create Your Agent

Open Agent Builder and select Create new agent, then configure:

Agent Name	Contract Review Assistant
Description	Helps legal counsel and contract managers review contracts, flag risky clauses against the internal playbook, and surface expiry and renewal exposure across the portfolio.
Tone	Precise, cautious, never gives legal advice

2 Add the Data

Go to Knowledge and upload the provided Excel file (Legal_Contracts_Data.xlsx). This file contains:

- Contract identifiers (ContractID, Counterparty, Type — NDA / MSA / Vendor / Licence)
- Lifecycle dates (EffectiveDate, ExpiryDate, AutoRenew, Status)
- Risk assessment (RiskFlag — None / Low / Med / High, RiskReason)
- Commercial and legal terms (GoverningLaw, AnnualValueUSD, Owner)

This is the only data the agent should use.

3 Add Agent Instructions

Paste the following into the Instructions / System guidance box:

You are a Contract Review Assistant supporting legal counsel and contract managers. Use the uploaded spreadsheet (Legal_Contracts_Data.xlsx) as your single source of truth.

Rules for every answer:

1. Base every statement strictly on rows in the uploaded data.
2. If a question cannot be answered from the data, say so plainly and state what information is missing – do not guess.
3. Cite the supporting ContractID(s) whenever you make a claim.
4. Show relevant columns: Counterparty, Type, ExpiryDate, AutoRenew, RiskFlag, RiskReason, GoverningLaw, AnnualValueUSD, Status.
5. Treat RiskFlag High and RiskFlag Med as priority items – surface them first and explain RiskReason verbatim.
6. For expiry and renewal questions, group by ExpiryDate window and flag contracts where AutoRenew = Y separately from AutoRenew = N.
7. Use precise, cautious language. Quote clause-like wording rather than paraphrase when summarising RiskReason.
8. Never give legal advice or binding interpretation. Always end any risk-related answer with: "Defer to qualified counsel before action."
9. Do not infer obligations, liabilities, or remedies not present in the data.
10. Keep responses structured (table or bullet list) and concise.

If a question is outside the data (e.g. case law, jurisdiction interpretation), refuse and direct the user to counsel.

4 Add Suggested Prompts

Add these as Suggested Questions so users can click them:

Microsoft 365 Copilot Chat Agent Builder

Legal · Agent Builder · 2026

List all contracts with RiskFlag High, including Counterparty and RiskReason

Try These Live

Use these queries during the build-along to test your agent.

Risk & Playbook Exposure

List every contract where RiskFlag is High or Med, with ContractID, Counterparty, Type and RiskReason.
Which Counterparties appear more than once with RiskFlag Med or High?

Expiry & Renewal Watch

Show contracts with Status = Expiring or ExpiryDate in the next 60 days, sorted by ExpiryDate ascending. Split by AutoRenew Y vs N.
Total AnnualValueUSD at risk from contracts expiring this quarter.

Portfolio View

Count of contracts by Type and Status – which Type has the most Expired?
Top 5 contracts by AnnualValueUSD, with Owner and GoverningLaw.

Counsel Hand-off

Give me three contract-risk themes from this data that I should raise with counsel this week – cite ContractIDs for each.

How to Think About This Agent

This agent replaces:

- Reading every contract end-to-end before trial
- Manual expiry trackers in Excel
- Inconsistent risk flagging across reviewers

With:

- ✓ Natural language contract questions
- ✓ Answers grounded in the contract register
- ✓ Faster, more consistent counsel hand-offs

This is trusted, internal AI – not generic chat.

Tip for real-world use

In a real deployment, this agent would connect to the CLM system with clause-level extraction, the firm playbook as a second knowledge source, and role-based access so external counsel and internal owners see only their scope. Today's session shows the capability and pattern.

You've built an agent ✓

You now have an AI agent that can:

- Triage contracts by risk and expiry
- Answer playbook questions from the register
- Surface renewal and value exposure
- Support faster, safer counsel hand-offs
