

Build Steps

Cowork is task-driven — give Copilot a job, optionally schedule it, let it use your M365.

1 Open Copilot Cowork

Open Microsoft 365 Copilot and switch to Cowork mode (left rail). Confirm the surfaces you have available — Cowork can act on your behalf across:

- Outlook (read, summarise, draft, send, schedule)
- Teams (chats, channels, post messages, read history)
- Calendar (find times, create meetings, prep briefs)
- SharePoint & OneDrive (read files, write Word/Excel/PowerPoint to your files)
- Power BI (semantic models, reports, DAX queries)

2 Paste the Headline Task

Open a new Cowork task and paste the prompt below. This is the worked example for Consumer Experience — Store Performance — adapt names, channels, and Power BI reports to your tenant before running.

```
Every day at 8:00am, run the Store Performance Note for each store:

1. Do NOT send/post automatically – leave the draft for me to review. Tone is brisk and store-manager friendly.
2. Open Consumer_StoreOps_Data.xlsx from /Retail/StoreOps/ in SharePoint. Read every row for yesterday's trading day.
3. For each StoreID, capture: StoreName, FootfallCount, ConversionPct, SalesUSD, SalesVsTargetPct, NPSScore, StaffOnShift, StaffRequired, TopGap, NoteForStandup.
4. Compute per store:
Sales status (Beat / On / Miss vs SalesVsTargetPct)
Staffing gap (StaffRequired – StaffOnShift)
NPS movement (vs the same store's 7-day mean)
5. Roll up regional snapshot: total Sales, mean Conversion %, mean NPS, stores in Miss, stores understaffed by 2+.
6. For each store, draft a single Teams message (≤100 words) to that store's standup channel: yesterday's headline number, conversion %, NPS movement, the TopGap line, and one suggested focus for today drawn from NoteForStandup.
7. Draft a regional Teams message to the 'Area Managers' channel: regional snapshot table, the 3 stores most at risk (Miss + understaffed + NPS down), and one watch item. Leave as draft.
8. For any store missing yesterday's row in the workbook, draft a Teams DM to that store's manager asking for the sync. Leave drafts.
9. Never instruct on pricing, promotion, or HR action. Surface numbers, name the gap, suggest one focus – leave decisions to the manager.
```

3 Set the Schedule

In the task panel, choose Schedule and configure:

Frequency	Daily
Run Time	08:00 local (before store standups)
Execution Mode	Inline (recommended) — task remembers context across runs

4 Verify the First Run

Run once now (Run now) before scheduling kicks in. Confirm:

- Every store has its own draft, not a combined regional note
- Sales status (Beat / On / Miss) matches a manual SalesVsTargetPct check
- NPS movement uses a 7-day baseline, not yesterday only
- Drafts stay under 100 words and read like a store manager wrote them

Try These Live

Copy any of these into a new Cowork task — one-shot or scheduled.

Weekly Store Scorecard

Every Sunday at 6pm: read the last 7 days of the workbook. Build a one-tab Excel scorecard: StoreID, mean Footfall, mean Conversion, total Sales, mean NPS, days understaffed, TopGap frequency. Highlight top 3 and bottom 3 stores. Email the link to the Area Manager DL. Leave draft.

Staffing Gap Watch

Across the last 14 days, list every store-day where StaffOnShift was below StaffRequired by 2+. Group by StoreID. Identify any store understaffed on 4+ days. Draft a Teams DM to Workforce Planning with the list and 2 questions for the next rota build. Leave draft.

NPS Drag Investigation

From the workbook, list every store with NPSScore in the bottom quartile for 5+ of the last 7 days. For each, pull the most recent NoteForStandup and the TopGap field. Build a one-page Word brief for the CX lead: stores, stated gap pattern, suggested follow-up questions.

Top-Gap Pattern Pulse

Tag the TopGap field across all stores for the last 14 days into broad themes (stock / checkout / service / fitting room / signage / other). Identify the top theme per region. Draft a Teams message to the Retail Ops channel with counts and one question per region. Leave as draft.

How to Think About This Teammate

Cowork replaces:

- Store managers writing yesterday's standup note from scratch
- Area managers reading 7 dashboards before 9am
- Staffing and NPS drag spotted only at week's end

With:

- ✓ A per-store 100-word draft before standup
- ✓ An 8am regional snapshot with at-risk shortlist
- ✓ Gap patterns surfaced from the field copy itself

Not a chatbot. A scheduled teammate with full access to your M365.

Tip for real-world use

Retail teams read between customers. Keep store-level drafts under 100 words and lead with the headline number. Lift TopGap and NoteForStandup verbatim where you can — the manager's own words land better than any rewrite. Pricing and rota decisions stay human.

You've built a Cowork teammate ✓

You now have a Copilot teammate that can:

- Land every store's standup note by 8am
- Catch the at-risk stores before the day starts
- Surface gap patterns from real field notes
- Free managers to coach, not compose
