

Prompt Improver

Talk like a human · Get a FACETS prompt back · Paste and go

The Prompt Improver is a meta-agent. It doesn't do your reconciliation or build the forecast — it shapes the prompt that goes into the agent that does. Describe what you want in plain English; get back a structured FACETS prompt ready to paste.

The Workflow Loop

Four steps from plain English to a pasted-and-running prompt

1 Talk like a human

Open the Prompt Improver. Describe what you want in plain English. "I need to reconcile our AP balance to the subledger every month for the FC." No FACETS jargon required.

2 Answer its questions

The Improver scores your input against FACETS and asks targeted questions only where elements are Partial or Missing. Answer them in one go.

3 Get the oven-ready prompt

The Improver returns a full FACETS-structured prompt with validation checks and Excel standards baked in. Copy it.

4 Paste and go

Paste into the agent's Instructions or save as a starter prompt. Drive it with short triggers: "run for January", "run for GL 54200", "run with the May actuals".

Three Starter Prompts

Pinned on the Improver — click to begin

Assess my prompt

Paste a finance or accounting prompt to get a structured FACETS quality review.

Fill gaps in my prompt

Share a draft prompt. The Improver asks targeted questions to fill missing elements.

Show FACETS example

Ask for a worked example for a common finance task, demonstrating each FACETS element.

How it fits with the other agents

Build the Improver once. Then for every new agent (Reconciliation, Forecast, Board Pack, your own), use it to draft and refine the Instructions or starter prompts before you save them.

Worked Example

Monthly AP Reconciliation — then try your own

WHAT YOU SAY TO THE IMPROVER

"I need to reconcile our AP balance every month. It goes to our FC for sign-off. We are on FRS 102 and our materiality threshold is 1 percent. The files are the trial balance and the AP listing."

WHAT THE IMPROVER GIVES BACK

- T TASK**
Reconcile GL AP balance to AP subledger. Categorise differences as timing, pricing, missing, duplicate, other.
- A AUDIENCE**
Financial Controller for sign-off. May be reviewed by external audit.
- C CONTEXT**
UK limited company, FRS 102, materiality 1 percent.
- E EXAMPLE**
Prior-month-recon.xlsx structure where available.
- F FORMAT**
Excel (.xlsx). Tabs: Review Workflow, Recon Summary, Exception Detail, Source Data, Validation Checks. GBP 2dp.
- S SOURCES**
Trial Balance.xlsx (mandatory), AP Listing.xlsx (mandatory).
Optional: prior-month-recon.xlsx.

From now on, drive the agent with:
"run for January", "run for GL 54200", "rerun with May actuals".

Now Try Your Own

Pick a recurring task from your role

1 Write your ask in plain English

Describe what you want as if you were briefing a colleague. No FACETS jargon.

Mention who reviews it, your accounting standard, your materiality, and the files you'd attach.

2 Map it to FACETS

- T TASK** _____
- A AUDIENCE** _____
- C CONTEXT** _____
- E EXAMPLE** _____
- F FORMAT** _____
- S SOURCES** _____

3 Triggers — once saved on your agent

Write the three short triggers you'll use day to day:

Take-away

Use the Improver every time you write a prompt from scratch. Also re-run your live agents' Instructions through it at quarterly review — vague language and gaps creep in over the cycle.
