

Prompt Improver

Talk like a human · Get a ReFLECT prompt back · Paste and go

The Prompt Improver is a meta-agent. It doesn't write your status update or build your forecast — it shapes the prompt that goes into the agent that does. Describe what you want in plain English; get back a structured ReFLECT prompt ready to paste.

The Workflow Loop

Four steps from plain English to a pasted-and-running prompt

1 Talk like a human

Open the Prompt Improver. Describe what you want in plain English. "I need to write a weekly status update for our project." No ReFLECT jargon required.

2 Answer its questions

The Improver scores your input against ReFLECT and asks targeted questions only where elements are Partial or Missing. Answer them in one go.

3 Get the oven-ready prompt

The Improver returns a full ReFLECT-structured prompt with checks and your team's conventions baked in. Copy it.

4 Paste and go

Paste into the agent's Instructions or save as a starter prompt. Drive it with short triggers: "run for this week", "run for region EMEA", "rerun with latest data".

Three Starter Prompts

Pinned on the Improver — click to begin

Assess my prompt

Paste any prompt to get a structured ReFLECT quality review.

Fill gaps in my prompt

Share a draft prompt. The Improver asks targeted questions to fill missing elements.

Show ReFLECT example

Ask for a worked example for a common task, demonstrating each ReFLECT element.

How it fits with the other agents

Build the Improver once. Then for every new agent you build, use it to draft and refine the Instructions or starter prompts before you save them. Re-run live agents' Instructions through it at quarterly review — vague language and gaps creep in over time.

Worked Example

Weekly Status Update — then try your own

WHAT YOU SAY TO THE IMPROVER

"I need to write a weekly status update for our project. It goes to the steering committee. We have a one-page template. I pull data from the project tracker and the budget sheet."

WHAT THE IMPROVER GIVES BACK

- R** **ROLE**
Internal PM preparing weekly status.
- e** **EXPLICIT**
Progress, risks, blockers, next-week plan.
- F** **FORMAT**
Word doc. 1-page status template.
- L** **LIMITATIONS**
No speculative dates. RAG by template.
- E** **EXAMPLES**
prior_status.docx where available.
- C** **CONTEXT**
Steering execs. Friday EOD. Tracker + budget.
- T** **tone**
Neutral exec. Skim bullets. No hedging.
*From now on, drive the agent with:
"run for this week", "run for EMEA", "rerun with latest data".*

Now Try Your Own

Pick a recurring task from your role

1 Write your ask in plain English

Brief it like a colleague. Mention who reviews it, your standards, and the files you'd attach.

2 Map it to ReFLECT

- R** **ROLE** _____
- e** **EXPLICIT** _____
- F** **FORMAT** _____
- L** **LIMITATIONS** _____
- E** **EXAMPLES** _____
- C** **CONTEXT** _____
- T** **tone** _____

3 Triggers — once saved on your agent

Write the three short triggers you'll use day to day:

Take-away

Use the Improver every time you write a prompt from scratch. Also re-run your live agents' Instructions through it at quarterly review — vague language and gaps creep in over the cycle.
